

DESCRIPTION

The partitions system was created for children at nursery age. Durable, made of 12 mm birch plywood, varnished with ecological water varnishes, which guarantee a smooth to the touch surface. They contain zigzags, mirrors, windows with colored plexiglass and various manipulations. The design of the partition does not require the purchase of additional elements to connect them together. Nevertheless, they can be non-standardly arranged, creating a series of free-standing manipulation walls by using appropriate connectors (6512473, 6512474, 6512463), which allow you to put the screens together at an angle of 60 or 90 degrees. With a smaller space, the partitions can be mounted to the wall using slats 6512462. The wall fasteners and connectors are sold separately. Dim.: H. 65 x W. 80 x D. 1,2 cm
