

DESCRIPTION

Playing with a parachute is very popular in activities for babies and toddlers. The sea parachute is an innovative teaching aid supporting the sensory development of children. During the game, participants practice motor skills and eye-hand coordination, which is extremely important in the early years of development. The multitude of details, colors and shapes allows children and toddlers to experience new visual impressions while stimulating them to physical activity. Recommended especially for work with children aged 0-3, also during classes with parents. Parachute made of polyester. Dim.: dia. 2,5 m, 8 handles
